**Marta Serrats : 150 Best Eco House Ideas** before purchasing it in order to gage whether or not it would be worth my time, and all praised 150 Best Eco House Ideas:

18 of 18 people found the following review helpful. 150 Best Eco House IdeasBy Yo OliverThis book has beautiful photography. I find the information about eco principles is very brief and the snippets don't relate clearly to the photographs. I was expecting to get photographs with explanatory notes on how the eco ideas were utilised in the designs. There are plans included but they are so small I have difficulty reading them. Recommended for the photography, but this is not an instructional book on eco principles.20 of 20 people found the following review helpful. Picture book for adultsBy michael deenihanI'll start off with the good aspects of this book.-cheap-easy read-interesting designsnow the negative- might as well just do a Google image search because its just pretty much just pictures.- Doesn't really help those who are looking to build.Its not a bad book but there is no more useful information in it then any green living website.16 of 17 people found the following review helpful. Clearly a lot of work went into this mediocre bookBy James KI'm really sorry, but I have to say that while I understand the concept behind this book, it falls well short of the mark from my point of view. The photography is of acceptable quality, but really for the amount of detail shown in them, they're really too small. This may be the fault of the publisher, not the author, because the physical size is really to small to display the photographs properly. There is a real lack of detailed text about each house, and the illustrations also suffer the same fate as the photographs- they're too small, and I would have appreciated much more detail in them. Personally I would have preferred a "50" or "75 Best Eco House Ideas" in a larger form factor with much more detail about each house, than what this is- an undersized, detail-lacking coffee table book.

Featuring an extensive collection of full-color photographs, 150 Best Eco House Ideas features eco-friendly house designs created by internationally renowned architects and designers who have achieved practical, innovative, and stunning solutions adapted to the specific needs and tastes of their clients. Included here are the latest innovations in sustainable home design, including solar paneling, wind energy systems, environmentally-friendly heating and cooling solutions, thermal glazing, and trombe walls. 150 Best Eco House Ideas covering the diversity of current trends in sustainable home design, and is both the perfect resource for designers, interior decorators, and architects, as well an inspirational sourcebook for all homeowners interested in creating warm and inviting homes that cause only a fraction of the environmental impact of those created using conventional building methods.
