Their 'Pictorial Archive' series consists largely of images that are of art in public domain and I have often searched out my own design resources from books on history, archaeology, etc; finding a design on an antique Oriental carpet here and another on an urn there. This can be fun, like a scavenger hunt, but is a lot of work with many books or sources yielding only one or two inspirations and so I find these Dover 'collections' of designs most valuable. With an eye to cost though, I do like to see inside the

book before I buy. If I can find the book at the Library, I will check a copy out before making the decision of whether the book has enough potential inspiration to be worth the price, but many are not available in my community and so the 'Look Inside This Book' feature played a big role in my decision to purchase this book. With 3,000 decorative patterns featured, there is a lot of bang for the buck in this particular book. Some of the newer Dover releases have color renderings that may be attractive to look at but harder to transcribe into a usable diagram as a design source and so I found the black and white line drawings in this book very helpful. 1 of 1 people found the following review helpful. Terrific book By Joan Waff Having a FB Ancient Patterns Tangling Group makes this group fun. We have monthly challenges using the ancient designs. Members are enjoy re-creating ancient patterns. 1 of 1 people found the following review helpful. useful, but not impressive By B. Pereira This book was, useful for getting some designs, but they are crudely drawn and many are so similar that it's hard to tell the difference. I had hoped I'd be able to use much more than 9 out of 3000 designs.

Mythical animals, florals, rosettes, religious and secular symbols, more.
