Edward Denison, Jonathan Glancey, Dragana Cebzan Antic : 30-Second Architecture: The 50 most significant principles and styles in architecture, each explained in half a minute (30 Second) before purchasing it in order to gage whether or not it would be worth my time, and all praised 30-Second Architecture: The 50 most significant principles and styles in architecture, each explained in half a minute (30 Second):

3 of 3 people found the following review helpful. it was a good book. still isBy tayloras promised, the book arrived. it was a good book. still is. so great job book guy2 of 2 people found the following review helpful. Like Two Years of College in One BookBy Desert SageWow! This one goes through the history of architecture in a way that isn't dumbed down, yet isn't egg-headish, either. Extremely well written, focusing on prominent architects of history and the many, many "genres" and fads of architecture, replete with illustrations. Very good book for people like me who knew very little on the topic.2 of 6 people found the following review helpful. part of a collectionBy Ahdab H. MahdalyI collect

these 30-second books and this one is no difference. I didn't read it yet, but I skim through it and its wonderful

Exactly what did Roman architects do for us? Can you identify a voussoir or a vault? What is “architecture of the veil?” Are you able to articulate on Art Nouveau and Art Deco styles? And who was the father of the skyscraper? This set of 50 explanations of the innovations, theories, styles, and developments in architecture will equip you with all the answers and provide a rock-solid grounding in the essentials of the built environment—from ancient tomb to urban icon. 30-Second Architecture presents you with the foundations of architectural knowledge, explaining each idea, no matter how complex, using 300 words and one picture: all easily digested in a spare half minute. Expert authors are challenged to define and describe both the principles upon which architects depend, and the styles with which they put those principles into practice. So, if you want to know your arch from your elevation, and your Baroque from your Byzantine, or you wish to end your next dinner party with a stirring speech on biomimetics, this is the quickest way to construct your argument.
