Arthur M. Hind : A History of Engraving and Etching (Dover Fine Art, History of Art) before purchasing it in order to gage whether or not it would be worth my time, and all praised A History of Engraving and Etching (Dover Fine Art, History of Art):

0 of 0 people found the following review helpful. I highly recommend the bookBy BarbaraAn interesting and

informative book. Not all images discussed are shown so I combine reading it with viewing more either from my own collection or on line. Print sellers and the National Gallery in Washington have much to see. The author was an amazingly well informed man with a vast amount of information on prints. I highly recommend the book. 1 of 1 people found the following review helpful. Very old fashioned
By Cezar Tadeu Bartholomeu
Although it's a fact and detail filled account of printmaking's history, it has not an ounce of analysis...and it's very hard to read. Very old "art history", devoid of any consideration of culture and/or intentions behind printmaking. 4 of 6 people found the following review helpful. A must
By Richard Kent
This is an excellent reference work. A must for antique print collectors. It's value holds up no matter how much time goes by.

Arthur Mayger Hind (1880–1957) was a leading historian of engraving, one of the most highly respected art historians of modern times. Keeper of Prints and Drawings at the British Museum and Professor of Fine Art at Oxford, he was the author of the most complete history of etching and engraving that has yet been written. This book, formerly out of print for many years, contains references to every etcher or engraver worthy of mention from the early fifteenth century to 1914, and it gives a fair account of influences, artistic repercussions, and accomplishments of each individual. Beginning with a chapter on processes and methods of the twin arts, in which he covers line-engraving, etching, biting and stopping-out, tone processes, the tools used in the various methods, and so on, the author proceeds with a text that is fabled among artists, art historians, teachers, and students for its richness of detail and the brilliance of its author's obvious genius for research and criticism. He begins with the anonymous engravers of the fifteenth century, moves through Holland, Italy, and Germany to the great masters of engraving and the beginnings of etching in the sixteenth century, through the portrait engravers, master etchers, the practitioners of mezzotint, aquatint, crayon manner and stipple, and color print makers, to modern etching in the period prior to World War I. All along the way there are illustrations: over 100 magnificent works by Dürer, Finiguerra, Cranach, Lucas Van Leyden, Parmigiano, Van Dyck, Rembrandt, van Ruysdael, Blake, Tiepolo, Piranesi, Turner, Boucher, Goya, Millet, Whistler, and scores of others. All but seven of these plates have been reproduced from new photographs and are even sharper and clearer than those in the original editions of Hind's great text. As an aid to students of art history, there is a massive Index of more than 2,500 artists mentioned in the text, with their dates and brief individual biographical data. Furthermore, there is a classified chronological list, arranged by country, of important artists, movements, and styles, and the engravers and etchers who were influenced by them. Finally, there is a bibliography that is valuable for further reference work.
