**William Leavitt : A Modern Method for Guitar - Volume 1 (Music Instruction): Guitar Technique** before purchasing it in order to gauge whether or not it would be worth my time, and all praised A Modern Method for Guitar - Volume 1 (Music Instruction): Guitar Technique:

2 of 2 people found the following review helpful. Written by an all-time great musician and teacher! By Tom Sawyer I studied with Bill Leavitt at Berklee in the 60's. I think this method book was written more for adults and people who play other instruments and want to learn guitar. None of the exercises, etudes and duets are derived from familiar or traditional songs ( no "Home on the Range" etc.). This method book has the student develop pure reading skills as they apply to guitar. 2 of 2 people found the following review helpful. Incredible Guitar Method By Paul This is the method for the serious guitarist who wants to do it right. All the great players that have gone....and those that will be going to Berklee...have used and will use this method. If you're serious....get it....:~) 3 of 3 people found the following review

helpful. Halfway through the book in a few weeks and I ...By CustomerHalfway through the book in a few weeks and I can actually sight read in the first few positions now. Could always read standard notation, but never for guitar. This book has made it possible to read through tunes from the real book... finally!

(Berklee Methods). The beginning-level book of this comprehensive method teaches a wide range of guitar and music fundamentals, including: scales, melodic studies, chord and arpeggio studies, how to read music, accompaniment techniques, special exercises for developing technique in both hands, a unique approach to voice leading using moveable chord forms, and more.
