George E. Woodward, Edward G. Thompson : A Victorian Housebuilder's Guide: Woodward's National Architect of 1869 (Dover Architecture) before purchasing it in order to gage whether or not it would be worth my time, and all praised A Victorian Housebuilder's Guide: Woodward's National Architect of 1869 (Dover Architecture):

0 of 0 people found the following review helpful. Useful resource for Victorian American home architecture. By Jayse Garcia
A great synopsis of home architecture from 1865. This is a superb reference, especially since I'm working on a project of that epoch.
0 of 0 people found the following review helpful. Excellent! By builder and maker
I bought several books similar to this one, and this is my favorite by far. This book provides a very nice compilation of ideas / examples for all types of victorian-style construction details.
0 of 0 people found the following review helpful. Great reference series
By Customer
Great reference series. I could spend hours flipping thru these. Looking at the various

blueprints. And listed work orders for each structure. Highly recommended.

Here are detailed drawings, floor plans, elevations, specifications, and vintage cost estimates for twenty distinctive Victorian structures, ranging from a humble cottage to an ornate brick villa. They have been reproduced from a rare 1869 publication of Woodward's National Architect, a publication directed to builders, carpenters, and masons of the Victorian era. Each of these highly individual and appealing structures has been meticulously rendered in a landscaped perspective view along with front and side elevations, first- and second-floor plans, and close-up sections. With more than 580 black-and-white illustrations, the text provides directions for finishing trim, baseboards, and wainscoting; completing brick and plaster work; constructing chimneys, cesspools, and cisterns; and much more. With its wealth of authentic detail, *A Victorian Housebuilder's Guide* is a valuable resource for restorers, preservationists, builders, and anyone interested in the era's architecture.

About the Author George E. Woodward (1829–1905) was a New York–based architect and a prolific publisher of architecture books.
