From Butterworth-Heinemann : Advanced Concrete Technology 4: Testing and Quality before purchasing it in order to gage whether or not it would be worth my time, and all praised Advanced Concrete Technology 4: Testing and Quality:

Based on the Institute of Concrete Technology's Advanced Concrete Technology Course, these four volumes are a comprehensive educational and reference resource for the concrete materials technologist. An expert international team of authors from research, academia and industry has been brought together to produce this unique series. Each volume deals with a different aspect of the subject: constituent materials, properties, processes and testing and quality.

With worked examples, case studies and illustrations throughout, the books will be a key reference for the concrete specialist for years to come. Expert international authorship ensures the series is authoritative. Case studies and worked examples help the reader apply their knowledge to practice. Comprehensive coverage of the subject gives the reader all the necessary reference material.

About the Author John Newman taught history of architecture at the Courtauld Institute of Art, University of London, until his retirement. He was advisory editor of the Pevsner Architectural Guides from 1983 to 2003 and is the author of several volumes in The Buildings of England and The Buildings of Wales series.
