**Hong Kal : Aesthetic Constructions of Korean Nationalism: Spectacle, Politics and History (Asia's Transformations)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Aesthetic Constructions of Korean Nationalism: Spectacle, Politics and History (Asia's Transformations):

While most studies on Korean nationalism centre on textual analysis, *Aesthetic Constructions of Korean Nationalism* offers a different approach. It looks at expositions, museums and the urban built environment at particular moments in both colonial and postcolonial eras and analyses their discursive relations in the construction of Korean nationalism. By linking concepts of visual spectacle, urban space and governmentality, this book explores how such notions made the nation imaginable to the public in both the past and the present; how they represented a new modality of seeing for the state and contributed to the shaping of collective identities in colonial and postcolonial Korea. The author further examines how their different modes were associated with the change in governmentality in Korea. In addressing these questions, the book interprets the politics behind the culture of displays and shows both the continuity and the transformation of spectacles as a governing technology in twentieth-century Korea. *Aesthetic Constructions of Korean Nationalism* is a significant contribution to a study of the politics of visual culture in colonial and postcolonial Korea. The book will be of interest to students and scholars of Korean Studies, Culture and Heritage Studies and Asian Studies.
