Mr. Bryan Carlile : After Ike: Aerial Views from the No-Fly Zone (Gulf Coast Books, sponsored by Texas AM University-Corpus Christi) before purchasing it in order to gauge whether or not it would be worth my time, and all praised After Ike: Aerial Views from the No-Fly Zone (Gulf Coast Books, sponsored by Texas AM University-Corpus Christi):

0 of 0 people found the following review helpful. Great book, large photos, haunting and awesomeBy 80 ShadesThis is an excellent coffee table book that covers the destruction from Hurricane Ike, in particular around the Galveston vicinity. The book is quite large, has excellent quality print, and the photos are amazing. I do feel a bit guilty looking at the destruction of the lives of good people, but I would rather think I am honoring and acknowledging the power of nature (somehow I doubt this book will be found on the coffee table at the Galveston Realtor's Office or Galveston Chamber of Commerce!). Anyway, great job on the book; most people that are interested in nature's fury will love the book.0 of 0 people found the following review helpful. InterestingBy La vendeuseWould have liked more pictures of Galveston proper.0 of 0 people found the following review helpful. Four StarsBy Tammy AvalosIt was a good book full of information.

The day after Hurricane Ike made U.S. landfall at Galveston, Texas, photographer Bryan Carlile was in a helicopter, working a service contract as a first responder. He took with him a native Texan's good memories of the Gulf

Coast but brought back images that tell the sobering story of this massive and historic storm.

"In 'After Ike', Carlile transforms the wrath of Ike that I witnessed from reporting on the ground for KHOU-TV, into a historically significant treasure for all by capturing the depth and breadth of Iker's destructive forces from the air. Far more than a book of simple photos, Carlile's sharp eye and acclaimed skills as an aerial photographer serve as a tour guide, through the eye of an artist, to one of the most destructive hurricanes to ever make landfall." -Mark Greenblatt, investigative reporter, KHOU-TV
