I have bought similar books that read like an encyclopedia and spend more time on projects you can't do that those you can do at home.I have played for 30 years but was never comfortable performing set-ups or

repairs. My local shops charge around \$80 for a basic set up. That is money I can save to buy more guitarsDon't be discouraged if your first couple set ups aren't perfect. After the first few it gets easier.0 of 0 people found the following review helpful. Not as describedBy CustomerI play bass, this book claims to cover bass , only one paragraph if that, then goes in depth on guitar. Waste of time!0 of 0 people found the following review helpful.
