Ronald Green : Architect's Guide to Running a Job before purchasing it in order to gage whether or not it would be worth my time, and all praised Architect's Guide to Running a Job:

1 of 1 people found the following review helpful. Written for a UK audience, not USABy brian williamsIf you are practicing in the USA, do not purchase this book. It wasn't obvious to me that this was written for a UK (and it's process adherents) audience. As it happens I have practiced architecture in the UK and this book might have helped to guide the process. But for someone looking for a guide of this type for a job within the USA, this book is not for you. First time I've sent a book back and was 5 stars with the return.

Best practice is the concern of this book. An architect has to be an administrator as well as designer, and smooth economical administration will provide the conditions under which client relations can be constructive and good design can be achieved. The book is divided into 76 short sections covering the entire process, from preliminary enquiries to final fees, each with a small flow chart showing who is involved and when. This sixth revised edition updates the contents in line with present day practice, bearing in mind the changes in terminology, technology, environmental demands and the legislative background. Ronald Green and Professor Ross Jamieson who writes the foreword to this edition, are both examiners for Part Three.

From the Publisher The book is divided into 76 short sections covering the entire process, from preliminary enquiries to final fees, each with a small flow chart showing who is involved and when. This sixth revised edition updates the contents in line with present day practice, bearing in mind the changes in terminology, technology, environmental demands and the legislative background. Ronald Green and Professor Ross Jamieson who writes the foreword to this edition, are both examiners for Part Three.

About the Author Ronald Green and Professor Ross Jamieson, who writes the foreword to this edition, are both examiners for Part Three of the Architecture course. The previous editions have been widely used by Part Three students.
