**From Palgrave Macmillan : Architecture, Materiality and Society: Connecting Sociology of Architecture with Science and Technology Studies** before purchasing it in order to gage whether or not it would be worth my time, and all praised Architecture, Materiality and Society: Connecting Sociology of Architecture with Science and Technology

## Studies:

This book examines the extent to which the insights of STS can be used to analyse the role of architecture in and for social life. The contributions examine the question of whether architecture and thus materiality as a whole has agency. The book also proposes a theoretical and methodological approach on how to research architecture's agency.
