John C. McEnroe : Architecture of Minoan Crete: Constructing Identity in the Aegean Bronze Age before purchasing it in order to gauge whether or not it would be worth my time, and all praised Architecture of Minoan Crete: Constructing Identity in the Aegean Bronze Age:

0 of 0 people found the following review helpful. Exceeded my expectations - good detail provided in construction methods and MinoanBy John BExceeded my expectations - good detail provided in construction methods and Minoan thinking3 of 3 people found the following review helpful. very interesting...By CustomerA very interesting book with many details about the Minoan architecture. I would recommend it to readers who are willing to learn a bit more about the style, the influence, the material used and the development of the Minoan houses, the villas and the Palaces.0 of 0 people found the following review helpful. For the ArchitectBy Heller BarrExcellent book, primarily on the architecture practices of Minoan Crete. Well packaged and prompt delivery.

Ever since Sir Arthur Evans first excavated at the site of the Palace at Knossos in the early twentieth century, scholars and visitors have been drawn to the architecture of Bronze Age Crete. Much of the attraction comes from the geographical and historical uniqueness of the island. Equidistant from Europe, the Middle East, and Africa, Minoan Crete is on the shifting conceptual border between East and West, and chronologically suspended between history and prehistory. In this culturally dynamic context, architecture provided more than physical shelter; it embodied meaning. Architecture was a medium through which Minoans constructed their notions of social, ethnic, and historical identity: the buildings tell us about how the Minoans saw themselves, and how they wanted to be seen by others. *Architecture of Minoan Crete* is the first comprehensive study of the entire range of Minoan architecture—including houses, palaces, tombs, and cities—from 7000 BC to 1100 BC. John C. McEnroe synthesizes the vast literature on Minoan Crete, with particular emphasis on the important discoveries of the past twenty years, to provide an up-to-date account of Minoan architecture. His accessible writing style, skillful architectural drawings of houses and palaces, site maps, and color photographs make this book inviting for general readers and visitors to Crete, as well as scholars.

"*Architecture of Minoan Crete: Constructing Identity in the Aegean Bronze Age* investigates the prehistoric and early historic architectural material record of the island of Crete from a perspective largely informed by reflexive archaeological theory... A highlight of the book is its visual aesthetic which emphasises for the reader that not only does McEnroe have a solid grasp of all the issues involved but he is also a highly skilled surveyor and draftsman... *Architecture of Minoan Crete* is a highly engaging and visually appealing volume that will make a handsome addition to any Aegeanist's library. The author's light narrative touch and his consideration of such a wide timeframe have culminated in a welcome general introduction to the subject." Frank Lynam, *Archaeological from Cambridge*

About the Author JOHN C. McENROE is the John and Anne Fischer Professor of Fine Arts at Hamilton College in Clinton, New York, and a member of the American School of Classical Studies in Athens. He has worked in Crete for many years as a field archaeologist and excavation architect. His recent publications include *Critical Perspectives in Art History* (co-edited with Deborah Pokinski) and *Pseira V: The Architecture of Pseira*.
