Subhankar Banerjee : Arctic Voices: Resistance at the Tipping Point before purchasing it in order to gage whether or not it would be worth my time, and all praised Arctic Voices: Resistance at the Tipping Point:

7 of 7 people found the following review helpful. Dark at first but worth the effort
By Michael W. Konrad
As indicated by the title, this book is a collection of different stories by various authors describing history of the Arctic from hundreds of years ago to the present. The beginning of this book is so depressing that you may want to just give up. The indigenous people of the Arctic have been treated badly in the past and now they have to try and live through global warming and oil exploration. The facts aren't always nice, but they are the facts. As the book progresses it lightens up a little so you can keep on to the end. It's well worth it, for you get a real feeling of the Arctic.

found the following review helpful. Insightful, inspiring, important. By ermwatersGreat selection of stories providing a crucial insight into the struggles of wildlife and people in the arctic, while also bringing to light why everyone around the world should start asking questions about the current oil industry activities and the consequent repercussions. 1 of 3 people found the following review helpful. boring and repetitive By Andres Iturriaga The topic of the book is important, but the stories are very basic, really almost all are not stories at all but accounts, reports or testimonies, many not written for this book, prefaced by long introductions very boring about when the author met someone or the date he asked someone to write something or what photos he took and when. Very repetitive too, it seems to me there are much more places people or animals they lost the opportunity to inspire. Here again and again about the same topic, how they have fought or how they will fight big oil when in reality they never see a fight, only complains or talking, words without taking any risk, if that means to fight to them it is no surprise they are getting nowhere. Only two stars because I like the Arctic and environment

"One of the great strengths of Arctic Voices is that it shows how Alaska and the Arctic are tied to the places where most of us live. In this impassioned book, Banerjee shows a situation so serious that it has created a movement, where 'voices of resistance are gathering, are getting louder and louder.' May his heartfelt efforts magnify them. The climate changes that are coming have hit soon and hard in the Arctic, and their consequences may be starker there." ndash; Ian Frazier, The New York Review of Books A pristine environment of ecological richness and biodiversity. Home to generations of indigenous people for thousands of years. The location of vast quantities of oil, natural gas and coal. Largely uninhabited and long at the margins of global affairs, in the last decade Arctic Alaska has quickly become the most contested land in recent US history. World-renowned photographer, writer, and activist Subhankar Banerjee brings together first-person narratives from more than thirty prominent activists, writers, and researchers who address issues of climate change, resource war, and human rights with stunning urgency and groundbreaking research. From Gwich'in activist Sarah James's impassioned appeal, "We Are the Ones Who Have Everything to Lose," during the UN Climate Conference in Copenhagen in 2009 to an original piece by acclaimed historian Dan O'Neill about his recent trips to the Yukon Flats fish camps, Arctic Voices is a window into a remarkable region. Other contributors include Seth Kantner, Velma Wallis, Nick Jans, Debbie Miller, Andri Snaer Magnason, George Schaller, George Archibald, Cindy Shogan, and Peter Matthiessen. From the Trade Paperback edition.

"The Earth and her beings have been speaking. But we failed to listen. Arctic Voices compels us to listen. We will stay deaf at our peril." mdash; Vandana Shiva, founder of Navdanya and author of Staying Alive: Women, Ecology and Development "A marvelous work, a marvelous landmdash;hear the voices that call us to save these jewels of our planet." mdash; James E. Hansen, director of NASA Goddard Institute for Space Studies and author of Storms of My Grandchildren: The Truth About the Coming Catastrophe and Our Last Chance to Save Humanity "One of the great strengths of Arctic Voices is that it shows how Alaska and the Arctic are tied to the places where most of us live. this impassioned book, Banerjee shows a situation so serious that it has created a movement, where 'voices of resistance are gathering, are getting louder and louder.' May his heartfelt efforts magnify them." mdash; Ian Frazier, The New York of Books ldquo;Part of our failure to recognise the dangers at stake is that the Arctic still tends to be perceived as a big barren desert of ice, apolitical and disconnected from our political concerns, up for grabs. The book Arctic Voices: Resistance at the Tipping Point offers an encyclopedic approach to reframe such understandings. rdquo; mdash; Manuela Picq, Al Jazeera, ldquo;Their reverence for, and connection to, the earthmdash;its animals, water, mountains and landmdash;is beautifully described in Arctic Voices, and each essay is as much a prayer as a call to activism. rdquo; mdash; Eleanor J. Bader, Truthout, "Just in time, then, comes Banerjee's latest volume, Arctic Voices, a wakeup call from 39 artists, writers, biologists, Alaska Natives and activists [...] the eyewitness accounts and reports in Arctic Voices question the wisdom of relying on fossil fuel fixes, urging restraint in our approach to the nation's last great wilderness area." mdash; Michael Engelhard, High Country News "Right from the beginning I'm emotionally connected with this book [...]" mdash; The Environmental Blog About the Author Over the past decade, SUBHANKAR BANERJEE has been a leading international voice on issues of arctic conservation, indigenous human rights, resource development, and climate change. In 2003 he published Arctic National Wildlife Refuge, a photo book of his fourteen-month long journey in the Arctic National Wildlife Refuge. Through a Lannan Foundation grant, 10,000 copies of the book were donated to libraries and policy makers across the country. He was recently Director's Visitor at the Institute for Advanced Study in Princeton, Distinguished Visiting Professor at Fordham University in New York. He has received a Distinguished Alumnus Award from New Mexico State University and a Cultural Freedom Award from Lannan Foundation. Banerjee lives in New York City.
