**Santos C. Vega PhD : Around Miami (Images of America)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Around Miami (Images of America):

1 of 1 people found the following review helpful. Great for anyone interested in the town and it's historyBy Rita AckermanThis book shows the history and the people of Miami, Arizona an old copper mining town. The photographs are clear and many came from individuals so probably aren't available anywhere else. Great for anyone interested in the town and it's history.0 of 0 people found the following review helpful. Santos Vega has compiled an excellent history of the "other" Miami and its industryBy Bruce TramplerThe spirit of this copper mining community in Eastern Arizona lives through photos and text. Santos Vega has compiled an excellent history of the "other" Miami and its industry, families, and culture. An excellent read.0 of 0 people found the following review helpful. Good Quality, on

time. By Mary J. Ebner The book quality was as promised. It was delivered on time.

During the late 1800s, prospectors in search of gold, silver, and copper began to settle around the Pinal Mountains area in Miami. By 1918, several mining companies had established roots and contributed to the town's booming growth. The community established housing, schools, a hospital, and a town government, and the population grew to 5,000. Soon, Miami achieved recognition as one of the main mining towns in the state, along with neighboring Globe, Jerome, Morenci, Superior, Ajo, and Ray-Sonora. The new mining opportunities brought immigrants from around the world to settle in the area and eventually turned Arizona into a leading contributor to the copper industry. Although mining's hold on the local economy has changed over the years, today at least 20 percent of Miami-area employment is centered around copper mining, which remains close to the heart of the first hardy miners' descendants.

About the Author Santos C. Vega, PhD, is a native of Miami and graduated from Miami High School before serving with the US Air Force during the Korean War. Currently, he is professor emeritus of the Hispanic Research Center at Arizona State University. Vega's publications include numerous articles, the novel *The Worm in My Tomato*, and the Arcadia Publishing title *Mexicans in Tempe*.
