There are about 200 books in this ebook series that is offered in the kindle store for either free or for .99cent;. You can't really go wrong with the books offered for free. There is a variety of subjects covered and most of the books follow about the same format. You can take a peek inside the books by clicking "Look Inside" and this is pretty much what you get in each book.I like this particular book. It seems the format of this book and most of the Baby Professor books, have a picture with a paragraph and facts on the page. Then the next page is just a photo. Seems a little waste of space as another paragraph and cool facts would be very welcome. But again, for the price, it's hard to complain.I plan on keeping these books on my iPad for down time for my kids when they get bored waiting different places like the doctors office or practice for a sibling.***** I received this ebook for free for my honest review. *****0 of 0 people found the following review helpful. Love the format of this ebookBy rkreviewerLove the format of this ebook. Very easy to read. Simply highlights the features of

the continent rather than a specific country like most similar topics. It really intrigues the reader with the stunning photos throughout. I really like how it does not target places that everyone has heard of and visited or added to their bucket list. It really provides an exceptional learning experience no matter what age the reader is. I would definitely recommend reading this book even if you do not plan to travel to these destinations so that you may become familiar with new places you may not have ever heard of. I really enjoyed this book especially since it was not setup like a travel guide. Instead it was simply a leisurely and relaxing nonfiction read. I received this product free for reviewing purposes, however my opinions are all my own. 1 of 1 people found the following review helpful. Temples in Egypt, Animals in the Serengeti and Natural Wonders just to name a few equals Amazing!!! By R. Thomas Around The World Must See Places: Africa Reading to a child 15 minutes a day from birth encourages desire for reading and learning. At times I find myself struggling to keep their attention with all the advancement in technology and apps for learning when reading a book... I always end up giving in and saying "OK you can play this game"; or saying to myself "At least they are learning something..."; Just finding that balance between technology and old fashioned learning is a struggle. But with these Kindle books from Baby Professor, I'm regaining the confidence that there is a balance and learning and reading doesn't have to end with digital confetti and a "YaaYaa"; to get children excited about learning. Now I am bashing Apps they are a life-saver especially when you are busy cooking, cleaning or in public setting. SmileOK airing my soul moment is over LOL, I am truly appreciative of the nostalgia I got when reading this book with my loves. Since I've visited Africa, seeing the effort that was made in this book to capture the amazing-ness of this continent is commendable. The Temples in Egypt, Animals in the Serengeti and Natural Wonders just to name a few equals Amazing!!! The pictures, descriptions... jogging their memory about King Tut. Oh and 1 word "Megafauna"... Love It! Not only am I inspired to learn more about these places my kids ask can we read more. I really could rave on about this book, these series of books, I can't wait to read the rest. I received this product at a discount or for free.

See wild animals in their natural habitat when you go on a virtual tour of Africa. This culture-rich expanse is a trove of knowledge on biodiversity and how wild animals and humans live and interact with each other. Use this book to raise awareness on the importance of wildlife. Grab a copy now!
