Tom Hardy : Art Education in a Postmodern World: Collected Essays (Intellect Books - Readings in Art and Design Education) before purchasing it in order to gage whether or not it would be worth my time, and all praised Art Education in a Postmodern World: Collected Essays (Intellect Books - Readings in Art and Design Education):

Many of the essays pinpoint the stagnancy of teaching methods today and discuss the reductive parameters enforced by the current curriculum. The radical tone that echoes through the entire series of papers is unmistakable. Throughout the book, postmodern theory informs the polemical debate concerning new directions in educative practice. Contributors shed new light on a postmodern view of art in education with emphasis upon difference, plurality and

independence of mind. Ultimately, the paper provides a detailed insight into the various concepts that shape and drive the contemporary art world and expands the debate regarding the impression of postmodern thinking in art education.

About the Author Tom Hardy has worked as an art teacher in secondary schools for 23 years and has led art departments in inner-city, mixed, single sex, and selective schools. He is currently head of art and design at North London Collegiate School and sits on the council of the National Society for Education in Art and Design representing London and the home counties.
