Infant activities helpfulBy BetsyI ordered this book and CD because we added an infant-toddler music class for children with parents this year at our school. I received a recommendation from Bright From the Start in Georgia as a good resource for materials. I was very happy with the book and the CD has made it so easy to plan the class. I also ordered other materials from Lynn Kleiner for the older age groups.0 of 0 people found the following review helpful. For your musical babyBy A CustomerChock full of songs and rhymes, with detailed instructions on how to use these with your under-one-year-old. If you don't read music, get the associated CD and away you go!3 of 3 people found the following review helpful. Same with the "Kids make music, Babies make music too!"By burcak toktarI have bouht this book after I have bought the CD of "Kids make music, Babies make music too!". I have thought it is a new one as two years passed from the first's publishment. But unfortunately,

The "Babies make music (Parent)" edition was exactly the same with the old one, only 3 introductory pages for parents have been included. So it was a waste of money for me. The including CD was the same, too. So buying the first book "Kids make music, babies make music too! with its CD is enough for teaching music to babies, toddlers and preschoolers.

This wonderful book allows moms and dads to help develop musical skills while spending special time with their babies! Lynn Kleiner, master educator, has written over 30 songs and activities that are fun and easy to do at home or in a learning center classroom environment.
