Lewis Hetherington, Liam Jarvis, Hannah Barker : Beachy Head before purchasing it in order to gauge whether or not it would be worth my time, and all praised Beachy Head:

It has been a month since Stephen jumped. Amy collects her husband's effects, the things he had with him

gathered in a single box. There was no sign ndash; no warning of what he would do. As fractured memories of their last night together rewind, replay and unravel, she is desperate to find out why. Joe and Matt are making a documentary. Whilst reviewing their footage they make a startling discovery that takes their film in an unexpected direction ndash; the blurred image of a man jumping from the cliffs. Beachy Head is a powerful look at the ripple effects of one man's decision to take his life. A quietly splendid production, magically well staged; it lingers long; -The Observer's Beachy Head treats its sombre core themes ndash; mortality, grief and artistic responsibility ndash; with a clever, caring and occasionally humorous theatrical intelligence. Well-researched and simply but fluidly staged, it is a skilful blend of text of technology. Analogues's desire to probe the painful, mysterious emotions behind clinical facts is honourable. ndash; Donald Hutera, The Times
