At slightly under 30 pages it is a factual book filled with specifics about bears in general and 9 species of bears. I would not call any of the pictures

amazing but each species has a high quality picture to show what it looks like. There are indeed 101 facts spread out among all the bears. I believe that unless you are already an expert on bears there is something you would learn from this book. This is actually a book for all ages as there is nothing scary in it for young children and enough facts for all to learn. I did notice some very important tips were missing, the ability to tell the difference while hiking in bear county between the ferocious grizzly and the milder black bear: While hiking in the wood you should always take extra precautions and keep alert for bears. It is advised that while outdoors to wear noise producing devices such as little bells on their clothing to alert but not startle the bear unexpectedly. Also to carrying pepper spray in case of an encounter with a bear. It is also a good idea to watch for fresh signs of bear activity and know the difference between black bear and grizzly bear droppings. Black bear droppings are smaller and contain lots of berry seeds and squirrel fur. Grizzly bear droppings have little bells in them and smell like pepper. By S Jackson When rating children's books I like to go by these guidelines. I currently teach a multiage classroom of 1st and 2nd graders with varying ability levels from non readers to students reading at or above a 5th grade level. My rating: 4 stars based on text quality. What or if I would use this for: I would use this as a resource for my students or for a boy or needs extra practice reading and is very motivated by bears. What my students thought: All the boys in my class loved it. A few girls were really into it as well- but a few also covered their eyes because they were scared. So I would recommend you know your child and or class before getting this. For instance, I wouldn't read this to my 5 year old niece. Quality of photographs or illustrations: EXCELLENT! Depth of knowledge: Excellent! It was great to read to my students about DIFFERENT SPECIES of bears! Text quality: I do not like that it is plain font with a white background. This tends to turn off students very quickly.???? I did get a discount for my honest review of this digital book: Bears: 101 Fun Facts Amazing Pictures. I test all products before reviewing them. I am ALWAYS honest in the reviews I give. I will not give 5 stars unless I think it is accurate in the description and high quality. By Elizabeth This ebook is offered for free right now so at that price it's definitely a 5 star review. But even if it wasn't, it would be at least a 4 star reviewing depending on the price. You can click "Look inside" on the main product page on and see the first few pages of the book. I really like this book because it's just like the title says... 101 Super Fun Facts. My kids love Fun Fact books. This book is great because it goes into a little more detail than other "fun fact" kind of books I've read recently. For example: this book says that Bears are omnivores. That means that they eat both meat and plants. I like that it not only states a fun fact but gives the definition of a term that kids reading it might not be familiar with. Also, one fun fact is that a male bear is called a boar. A female bear is called a sow and a baby bear is a cub. They really could've considered this 3 fun facts but instead labeled it as just 1. The book is broken down into about 11 chapters. The first one is the introduction with about 14 fun facts. At the end is a conclusion about how humans are bears only predator (almost.) All the chapters in between talk about different types of bears including, kodiak, polar and sloth. So all in all a great book especially for free!***** I received this book for free in exchange for my honest review. *****

This book depicts the wonder of the world of Bears in all its glory. Children are given a well-rounded understanding of this fascinating creature: its anatomy, feeding habits and behavior. The following bears are featured: * The abundant American Black Bear * The shy Asiatic Black Bear * The endangered Giant Panda Bear * The silvery Grizzly Bear * The awesome Kodiak Bear * The sweet-toothed Malayan Sun Bear * The carnivorous Polar Bear * The unique Sloth Bear * The diminutive Spectacled Bear The pictures look great even in black and white and are excellent on the full color kindle. The description in the large text beneath is simple enough for early readers or for a parent to guide a child through. There are also picture captions that provide more information to talk about with your child. Alternatively, a child of any age (even the child in you) can just look at the images and appreciate its beauty. Enjoy!
