**A. Pinder : Beazley's Design and Detail of the Space between Buildings** before purchasing it in order to gage whether or not it would be worth my time, and all praised Beazley's Design and Detail of the Space between Buildings:

A new edition of a book widely regarded as a classic of landscape architecture, it deals with the 'bits' that go in between the different parts of the urban landscape. A completely updated text makes it suitable for both the professional and student.

The book's greatest value is that it discusses the topics it covers from the holistic position of a designer.—Landscape News
