Father was a professional and I missed the smell of paint and sizing and paper, all of it....however there are no extension courses nearby, no teachers nearby and in short nothing nearby....except my belovedso I started ordering books...and reading and practicing and LEARNING....If you are in the same situation I recommend you begin with the books that have tracings to help you get started.....and following the instructions is crucial until you learn how paint works and how thick or thin you need your mixes...This book is an excellent 2nd stage book...no tracings but chock full of instructions, helps and hints. There are enough books such as this at to give you a good base line of learning, but if you dont work at it every day what's the use? I have so enjoyed this book and
