I bought it as a kindle book, and after using it on my iPad, which I use for music playback while practicing, it is not easy to use. The notes are too small to see unless you zoom in, and that requires double tapping on the screen to see it, then you have to double tap again to shrink it back to normal size and turn the page, then zoom in again. Repeat, repeat, repeat. It gets to be too much hassle. A book would have been much more useful for reading music.20 of 20 people found the following review helpful. The classics of Def leppard in Tab form.By Wiseguy945This is the 16 song version of this book. I do believe there is a 21 or 22 song version available. This one contains all of the classics, music and tabed. 80's rock sheet music at its best
By DJBI am a beginner guitar learner. I love Def Leppard and aspire to be able to play their songs someday. This book has all their hits and it is set up nicely. While I can only play bits and pieces of the sheet music, its great having it and all the words to sing along with. Gives me something to look forward to being able to play in the future. For anyone who is intermediate to an advanced player and who likes 80's rock, this is fantastic.

(Guitar Recorded Versions). Guitar transcriptions for 16 songs from these legendary rockers, including: Animal * Armageddon It * Bringin' on the Heartbreak * Hysteria * Love Bites * Photograph * Pour Some Sugar on Me * Rock of Ages * Women * and more.
